We are very satisfied and have received many good comments about the gentleness and the production from the bees I am hauling from Gardner Apiaries - Spell Bee Company of Baxley Georgia.

Listed are several reasons you may want to try them.

- * These bees are certified African free
- * These bees are gentle and are great honey producers
- * They are on the cutting edge of new technology to combat CCD and other diseases

FREE: Everyone who orders bees will receive a free sample of Niger (finch bird seed) to plant. This is a great nectar producing annual your bees will love and finches will love you for planting it. If my crop works out, next year I will have seed to sell
