

2024 WOLF HONEY FARM PACKAGE BEE ORDER FORM

Wolf Honey Farm 578 Hwy 63 Baldwin, WI 54002 Phone 715-684-2095

email dwhoney@baldwin-telecom.net web www.wolfhoneyfarm.com

Important read: 4 years ago we became aware of Super DFM which made a lot of sense to help our hard-working bees fight poison pollen from GMO crops and pesticides. What is it? Super DFM is a direct fed microbial formula that provides beneficial healthy bacteria to the bee's digestive tract. Super DFM is a safe formulation that stimulates bee's health, digestion and provides additional benefits.

We are suppliers and buy direct from the science manufactures. I used DFM on my bees this past season and they produced a nice crop of honey and were looking good going into winter so will see next spring how they come through.

We have been buying our package bees from Gardener Apiaries {Spell Bee Co. LLC} for twenty plus years and have been greatly satisfied with the bees and the on time service we have received. The bees are Italian crossed with Carniolian and Buckfast. These bees are kept in Georgia year around. They are not taken to California where they are shaken and bees pulled from there.

Important Disclaimer

- Delivery date will be held as close as possible. Due to weather and travel problems, you will be notified if a delay results.
- Cancellations must be made by April 1. No refunds after this date unless packages can be sold.
- Bees **MUST** be picked up on the designated pick up day during our pick up schedule. **If you are out of town please arrange for someone to pick up for you.**
- Package bees not picked up within 24 hours of pick-up day **will be forfeited with no refund**

Bee Syrup Feeder: The spring weather the last couple of years has not been very good for starting bees. The type of syrup feeder is very important for success of the colony. Again, we offer a sturdy one-gallon feeder pail with a screen hole that can be inverted over the inner cover hole, enclose with an empty hive body. **This is the very best type of feeder for inclement weather.** Order ahead and save

If you know anyone interested in beginning beekeeping please tell them about the class
